# Email Account Forwarders

Email account forwarders allow you to send a copy of all mail from one email address to another. For example, if you have two different email accounts, *joe@example1.com* and *bob@example2.com*, you could forward *joe@example1.com* to *bob@example2.com* so that you do not need to check both accounts. Note that the forwarded mail will still be delivered to the original address as well.

**Current email forwarders**

Add Email Forwarder (/hosting/email_manager/forwarders/adddomain)

## Forward All Email for a Domain

In addition to forwarding individual mail accounts, you can forward all email from one domain to another.
